

# BLAST MEDIA DATA SHEET

# GUYSON WALNUT SHELL

(for use with dry compressed air systems)

## General

Guyson walnut shell blast media is a biodegradable, natural product made entirely from ground or crushed walnut shells. As the product is relatively soft, there is little chance of damage to component substrates.

## Applications

Removal of corrosion and carbon from automotive components and electrical equipment.

Deflashing and cleaning without dimensional change.

Cleaning marine turbines.

Removing paint and graffiti

## Chemical composition

Walnut shell

## Physical data

Shape	:	Angular
Colour	:	Light brown
Density	:	0.44 – 0.77 kg/l
Hardness	:	3.00 – 3.50 Mohs

**Pack Size** : 25 kg

See Guyson MSDS reference 40 for all other details

Walnut shell is a non-toxic and non-hazardous product that contains no free silica. No special disposal precautions are required for the product once it has been used for blast finishing purposes. However, contamination from a specific application or process must also be considered prior to disposal.
