## FLO-TEMP SERIES

### MOULD COUPLINGS

Hansen Flo-Temp series couplings are designed to give fast, leak-free connection and disconnection of coolant lines on injection moulds and dies.

- All metal parts in sockets are brass or stainless steel. Seals are Viton.
- Valved versions of sockets give automatic coolant hose shut-off on disconnection.
- Various end connection sizes available on both sockets and plugs.
- Interchangeable with DME-type couplings
- Immediate delivery from stock
